Coffee Break Webinar Series

What's new in SCOM 1807

# Topic

## A look at the newly released SCOM 1807

### Discussion points:

- Installation
- Agent changes
- Web console changes
- Miscellaneous changes

# Installing 1807

As a semi-annual release channel build, 1807 is not available as a stand-alone installation

- First you must install SCOM 1801
- Then update Server roles (MGMT Servers, ACS, Web console, Gateways, Consoles, and Reporting)
- Apply SQL scripts
- Import updated management packs
- Update Windows Agents
- Download updated Unix/Linux MPs and Agents

<https://support.microsoft.com/en-gb/help/4133779/system-center-operations-manager-version-1807>

# Agent changes

Microsoft has continued investing in cross-platform monitoring with further enhancements

## Linux agent

- Now supports log rotation (using logrotate)
- OpenSSL 1.1.0 is now the supported version (from 0.9.8)
- Ubuntu 18 and Debian 9 now supported
- Psudeo file systems are no longer detected

## Windows

- APM feature can now be disabled during agent installation

# Web Console

Introduced in SCOM 1801, the new HTML5 web console receives further improvements

- Support for PowerShell widgets
- My Workspace introduced
- Visualise effective configuration for an object
- Modify the Alert resolution state from the Alert drilldown
- Network node/interface visualisation
- Increased icon size in the Topology widget
- View/Edit Scheduled Maintenance mode

# Other changes

- The Service Manager 1807 console can now be installed on a server with SCOM 1807 components
- SQL Server 2017 support
  - Only supported if SCOM 1807 is installed on SQL Server 2016 and \*then\* upgraded to SQL Server 2017
- A number of bug fixes, fully covered in KB4133779
